- This service is operated by NTT Broadband Platform, Inc (NTTBP) .
- This service is provided on a best-effort basis. Therefore, connection speeds and quality cannot be guaranteed.
- Please understand that no WEP key or other encryption is set. Security is the responsibility of the user.
- You must enter your e-mail address on the entry page.
  - \* Registration is not required after the second login.
- After registering user information, the user is automatically logged into the internet. Connection is provided for 180 minutes. After 180 minutes have passed, the user will be required to log in again from the security notice page.
- The service is available up to Unlimited per day.
- VPN and some other services may not be accessible due to the design of the network.
- No devices or software used by customers of this service are supported by NTTBP. Please contact the device or software manufacturer for support.
- Please be aware that NTTBP shall assume no responsibility whatsoever in the event of any personal damage to the user or dispute with a third party resulting from use of this service.
- Service may be temporarily unavailable due to equipment maintenance or other reasons.
- If a user's device has been configured with some domain filters or spam filters, this registration e-mail may not be able to get through to the recipient successfully.
- NTTBP takes no responsibility for losses or damages that come from being unable to use an API provided by a third party due to failures or malfunctions, etc.
- The URL stated in this registration email will be valid for 10 minutes from when the email is sent.
- When using an SNS account, the API of the respective SNS company will be used.
- You may connect to the Internet for 10 minutes only in order to receive your registration email. The Internet connection will be available without user registration during this time only, and you will be transferred to the portal screen after 10 minutes.
- The URL stated in this registration email will be valid for 10 minutes from when the email is sent.
- NTTBP will not acquire any personal information tied to your social networking accounts, unless specified by a separate contract with the area owner.
- In terms of the second connection onward, you will need to do authentication based on the MAC address linked to each device. Hence, if you want to use the free Internet connection service within the same area from a different device, you will need to register each device even if you have already registered with the same e-mail address.
- After registering for the first time using your email address or social media account, you can use the service without the need for any re-registration for 90 days.
